

# BRAVO: BRowser Analytics VisualizatOn

Adam Siefkas, Julia Heil, Ryan Burt, Matilda Whitemore, Austin Baysinger

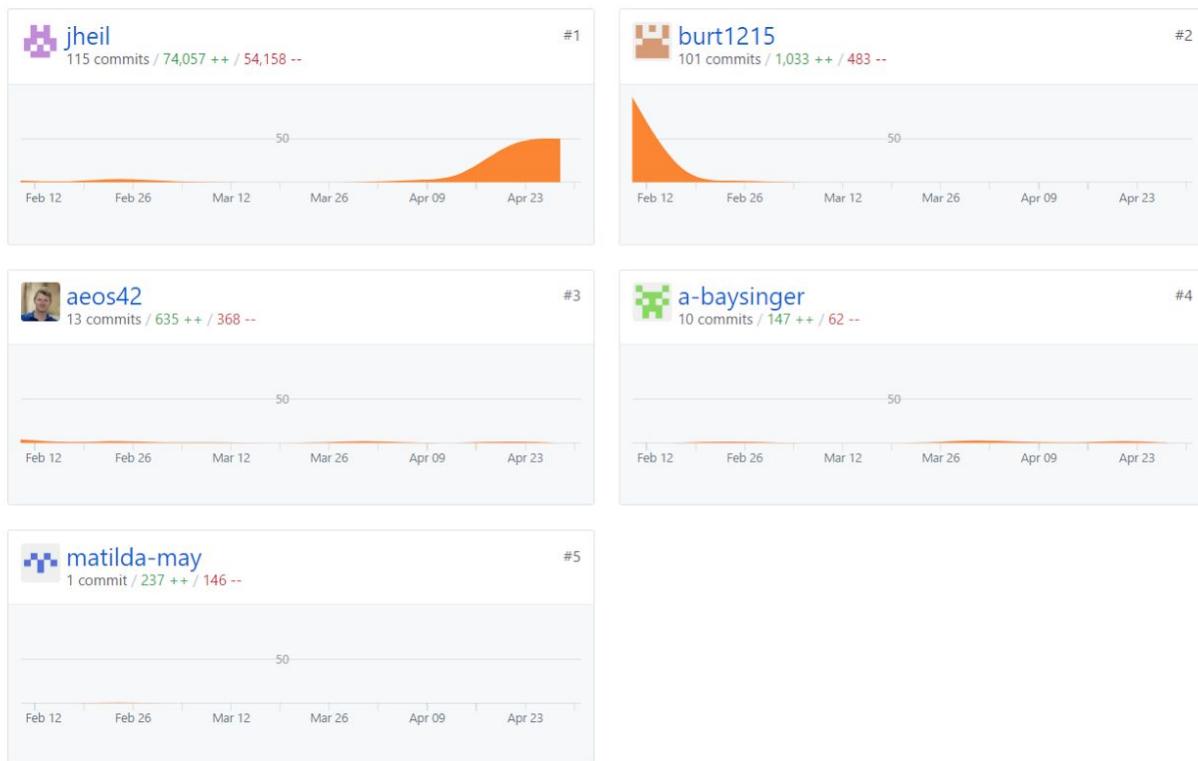

**Project Tracker:** For tracking our project, we started with Trello but ended up managing workflow via GitHub, and communicating over Slack.

**Link:** <https://trello.com/b/okK7Ozfy/bravo>

**Repository:** <https://github.com/aeos42/BRAVO>

## Screenshotted Contributions:

**Deployment:** Clone or download the repository. Once the file is unzipped, open Google Chrome. On the right-hand toolbar drop-down navigate to **More Tools > Extensions**.

Check **'Developer Mode'** in the upper right-hand corner.

Click **'Load unpacked extension'** and navigate to the folder named **'dataExt'** in the BRAVO folder.

Press **'OK'** with the folder highlighted.

The extension should now be installed--click the small icon that appeared in the upper-right hand corner of the browser to start using BRAVO!

**Autodoc:** We used JSDoc to document our project. Documentation is located in the repository under the folder **jsdoc**.

**Link:** <https://github.com/aeos42/BRAVO/tree/master/jsdoc>
